**Clear Coating:** A protective coating is added to the print, but the print surface appears unchanged. Recommended for portraits that will be displayed without glass.

**Texture Coating:** A protective coating is added to the print, leaving the surface with a fine pebble texture. This coating is thicker and more durable than clear coating.

**Faux-matting:** A custom-colored border is added to the print, making the finished piece one size larger than the image itself. Price includes clear coating.

**Standout mounting:** Your print is mounted on a ¾ inch thick board, then finished with black edges and clear coating. Standout-mounted prints should be displayed without frames.

**Artist's canvas:** Your print is permanently bonded to a traditional painter's canvas, mounted on sturdy masonite, and finished with a clear coating.

**Retouching:** Basic retouching is included with all prints, which will remove blemishes and stray hairs, soften lines in the skin, and enhance eyes. Head or eye swaps are an additional \$ 10. All other retouching is by estimate only.
